

## **ROADS UPDATE 3/26/17**

Since the last roads update on 3/9/17, the project manager retained by the association, AD Magellan (ADM), has been working with a local engineering firm Burkett and Wong to discuss the scope of work previously designed by Krazan.

On 3/22/17, Paul from ADM informed the committee that he met with the principal at Burkett and Wong and their initial opinion is that the scope of work by Krazan was over designed. As such, ADM will be working with other local engineers to obtain a revised scope/recommendation.

Please note: Until there is further review there are no guarantees as to how other designs will impact the overall cost of the project, but in an effort to keep the community informed, it was important to let everyone know of this recent progress.

We will continue to keep everyone up to date as the project progresses.
